Crossfield Curling Club

The Annual Meeting of the Crossfield Curling Club was held in the Oliver Cafe on November 9, 1936. Present: Gordon F. Purvis in the chair, C. H. McMillan Sec. Treas.

The minutes of the last meeting, held on April 9, were read and adopted. The financial statement was read again and adopted. Balance in Bank \$10.12.

It was resolved that the Building Committee, elected on April 9, be discharged, as it was not the present intention to go ahead with a new building.

It was affirmed that members in arrears should not be allowed to play while they placed themselves in good standing by paying arrears.

It was resolved that the pair of rocks could be raffled at a convenient time to suit the executive, provided the Club does not need them.

The following officers were elected or re-elected:
Hon. Pres., Frank A. Purvis; Pres., Gordon F. Purvis; Vice Pres., Mayor W. J. Wood; Sec. Treas., M. N. Jones; Chaplain, Rev. E. Longmire. Executive: Wm. Stralo, Carl Becker, Gordon Johnson, C. H. McMillan.

Fees: The same as last year, namely, \$7.00 for regular members in town; \$5.00 for new members; \$5.00 for country members.

Ladies Club and Caretaker: Arrangements left to the Executive.

Competitions: Pres. vs. Vice-President to open the Season and then the regular Square Draw.

Curling Rocks: Chas. Purvis and Hugo Ballan were appointed a committee to purchase up to three pairs of rocks for the Club.

Non Members: Glenn A. Williams and Ed Meyers were elected Honorary Members of the Club.

Rinks: Same as last year, to be selected by the Skips themselves and passed on by the Executive.

Waiting Room: Executive were recommended to do some repairs.

Slips: The following skips were elected: D. Onkes, C. H. McMillan, Chas. Purvis, Chas. Fox, Carl Becker, W. D. Carmichael, A. E. Edlund, J. L. McRory, Wm. Stralo, M. N. Jones, P. H. Fleming, Gordon Purvis.

ANNOUNCEMENT

All business Taxes for 1936 must be paid before November 30, 1936.
W. J. WOOD,
Mayor.

ARMISTICE DANCE

Thronged with a capacity crowd, the U.F.A. Hall was the scene of the Armistice Annual Legion Dance. Gaily festooned in Red, White and Blue Streamers, Flags and Bunting, the Hall took a gay appearance, and made a nice background for the cheery countenances that beamed on all sides.

The Gleechoir Orchestra augmented to seven pieces, provided the music, and Comrade Harry May was Floor Manager.

Throughout the evening a spirit of good fellowship prevailed, and those who attended voted it a good time. While it is true that the floor was decidedly crowded, the dancers took it all in good part, and true the game of Knock Knock was played on lots of shins, nevertheless, no one was seriously injured at least we did not see the Ambulance Corps called into action.

Our Society reporter had eye trouble for we are not in a position to describe the gowns worn by Mi-Ladies, but can state in all seriousness, that there were many beautiful ones on display, and they added colour to the gathering.

The Legionaires wore their Berets and they, being of many colours, added their touch to the surroundings.

The Legion had a successful evening, and we understand that many tickets were sold, although every purchaser did not attend. A safe estimate of the crowd would be about 270.

War time melodies and up to date ones were played and sung, and it went so well that some cases of Laryngitis developed.

A good time came to an end around 3 a.m.

Wm. Urquhart, Old Timer and well known farmer of the Crossfield District, was rushed to Calgary last weekend for medical attention.

Board of Trade Visits Drumheller Feeling of 'Good Fellowship' Created

2nd Vice-Pres. Tredaway States

"We Face a Challenge"

KEEP FLAGS FLYING

Headed by Vice-President T. Tredaway, a good-will delegation of some twenty members were guests of the Drumheller Board at a dinner held in the White House banquet room, Wednesday, November 4th.

Met by Secretary Mackay, of Drumheller, the locals were entertained at the Hotel Alexandra during the afternoon, and also taken for a drive around the City, and shown through the winter workings of the Midland Mine.

Taking, as his topic, "Facing a Challenge", Mr. Tredaway prefaced his address by stating that several of the Crossfield members were making their first visit to Drumheller, and that while the city was new to them, the name was not, as "Drumheller" was a by-word in Crossfield, owing to the large consumption of Drumheller coal in our district. Last year 2500 tons were consumed.

The statement had been made lately that Boards of Trade should be seen and not heard, and in this statement was a challenge which all boards of Trade had to meet. A Board of Trade was the premier community organization in any city or town, as it brought into play the co-operation of all the citizens of the community, having them work together for the benefit of the community as a whole. "In his recent flight," continued Mr. Tredaway, "Captain Mollison made this very significant statement, 'That the instinct of self-preservation dominated the sense of fear when one faced death and fought.'"

"Is fear a friend or foe? At the present time that fear or dread of consequences had swept right through the province of Alberta, and like Captain Mollison, we must lose all sense of fear, face this thing fight it."

Mr. William Laut, past-president of the Crossfield Board of Trade, reminisced on the old days, and recalled hauling coal from the Carbon and Drumheller districts some twenty-five years ago, by team and wagon. In those days they often stopped over at a half-way house, known as Buckskin Bill's place, and the charge for lodgings was twenty-five cents and a bucket of coal. The speaker mentioned that a number of former Crossfield residents had left that district to pioneer in Drumheller and district.

He stated that he was a great believer in Boards of Trade, which should be active in every community.

THE WORLD OF WHEAT

By H. G. L. Strange

Factors that have tended to raise prices have been: Poor prospects in Australia - Italy purchasing Argentine wheat heavily - Serious lack of sub-soil moisture in U.S.A. north-west and western Canada - Price of gold advancing - Japanese wheat crop estimates lower - Increase in Argentine flax acreage - Sale of diamonds from South Africa increasing considerably.

Prices have been pushed down by: Beneficial rains in Argentina - Large wheat exports from Balkans, South-ru Hindustan, India, Persia and Sweden - U.S. winter wheat crop very promising - Argentine further devalues currency - Seasonable crop weather in Europe - Exports of corn and pork from Rhodesia increasing.

A Board of Trade was the father of all organizations, for it was non-sectarian, non-political, and its membership open to all those who had their community's best interests at heart. He felt that, when prosperity returned to Alberta it would be found that the Boards of Trade of the province would be entitled to no small measure of credit for the recovery.

G. Y. McLean, Secretary of the Board, stressed tolerance in his address from which he took as his keynote, the sacrifices made in the Great War, the end of which will again be marked in a few days by another Remembrance Day. If the great sacrifices made by our heroic dead and those maimed for life meant anything, they meant that we should live in that spirit of goodfellowship tolerance, and good will that those in the "Garden of the Dead" died for, that this World might be a better place to live in.

Boards of Trade should set the example and bring all those in their community into line by their actions.

Remarks and greetings were also presented by Dr. S. H. McClelland, Rev. A. D. Currie and C. H. McMillan.

Prior to the addresses, Mr. Tredaway introduced the individual members from Crossfield to the gathering.

Those making the trip were Messrs. W. Laut, C. H. McMillan, T. Tredaway, Dr. S. H. McClelland, Rev. A. D. Currie, T. Mair, W. W. Stafford, C. Fox, E. Fox, J. T. Davis, M. N. Jones, A. E. Edlund, C. Aasmussen, A. Montgomery, Rees Jones, R. J. Hendry, J. P. Metheral, A. Harnock, G. Y. McLean.

The visit was enjoyed and a good feeling cemented, and at some future date the Drumheller Board will visit here.

Remembrance Day Services

A large turn out was present at the annual Remembrance Service, honouring those who fell in the Great War.

Led by the local band, the Veterans marched from the Masonic Hall to the United Church.

Rev. E. Longmire conducted the services. Praise was led by the Band, under the conductors of Mr. S. Willis.

At 11 a.m. The Last Post was sounded by Jack Fleming, the two-minute's silence observed.

Breaking the silence, the Reveille rang out on the air.

On the air, Mrs. P. Fleming and Miss M. Longmire sang a duet, "Oh Valiant Hearts."

At the conclusion of the Service, the Legion (Veterans) drove to the local Cemetery planting a Cross with a Red Poppy attached on each Veteran's grave.

Teachers Convention is being held at the Palliser Hotel, Calgary, Thursday and Friday, November 12 and 13. Most of the teachers from the surrounding district are taking in the Convention.

G. A. Williams of Calgary was a visitor in town over the holiday.

Glenn is far from feeling spry as yet but figures he is improving

OUT-OF-TOWN VISITORS
TO ARMISTICE DANCE

A few of the out of town patrons noticed at the Dance were Mr. and Mrs. G. Jones, Mr. and Mrs. W. D. Stillwell, Mr. and Mrs. M. Reid all of Calgary, Miss J. Collicutt, Miss B. Allen, Calgary, Miss A. Collicutt, Olds, Messrs G. A. Williams Calgary D. Tweedie Milk River N. L. McNeil Airdrie. There were many others but we did not manage to get their names.

Homework---How Much?

The present trend towards the reduction and perhaps ultimately the elimination of departmental, or external examinations for students in public and high schools is a step in the right direction, if for no other reason than that it should result as its corollary, in the reduction in the amount of homework demanded of pupils and especially those in their early teens.

Reports on the subject presented at the recent annual convention of the Canadian Education Association in Regina by a committee set up to study the subject of examinations in schools showed that the three prairie provinces, in confining departmental examinations to grade 11 and 12 students, that is, in the last two years of high school, are in the van of the movement to curtail the evils resulting from the rigidity which such a system necessarily entails.

It is not difficult to divine that the curtailment of the external examination system will result in more moderate assignment of homework in the public schools and at least in the first two grades in high school. It has already done so to some extent, but even yet there is good reason to believe that in very many classrooms, both rural and urban, too much is expected from children after school hours.

And this is particularly the case where children in the last two grades of public school and the first two grades of high school are involved. Children of these ages have reached a critical, physical formative period and during these years are laying a health foundation which will serve them good or ill in adult years. During this adolescent period, while mental development must not, of course, be neglected, physical development should not be cramped by eliminating much needed opportunities for recreation and health-giving physical activity.

With the incentive of the teacher to pile up homework for the students removed by the abolition of departmental examinations in the particular grades referred to, there is no longer any reason why children should be over-burdened, to the possible detriment of health.

This was recognized by the school medical officer of the London (England) County Council in 1929 when he wrote in his report:

"It is clear that school authorities who take it upon themselves to set work which is not done under their immediate supervision take upon themselves a very heavy responsibility. It is their duty to consider the result not merely upon scholastic advancement but upon health and physique in every individual case, and in every individual case it is their duty to ensure that in every 24 hours, there is not only time for work, for meals, for physical exercise and for sufficient sleep, but also their healthful relaxation and recreation."

In a handbook for one-teacher elementary schools the State Department of Public Instruction of Pennsylvania decrees:

"In primary grades home study should not be necessary. After the child has acquired the art of reading he should be permitted his own choice to take books home and return them as he chooses to do. If any home study is assigned in the intermediate grades it ought to be very limited. It should deal with such informational subjects as history and geography, and the pupil should not be held responsible the next day for having done a definite amount of work. He should be urged to read in these branches."

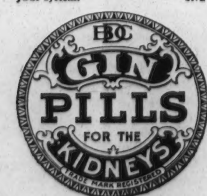

Discussing the same subject in a recent issue of Hygiene, under the caption, "Homework--The Big Bad Wolf of Education," J. F. Rogers made the following suggestions:

"Only work that can be done without help of parents should be assigned; home study should be made a privilege; it should not be too difficult; assignments should be made according to capacity and individual needs and for variety in subsequent class work. . . . home reading should be encouraged; homework should never be assigned as a punishment."

"In brief one may expect and must expect either injury to health or the exhibition of self-protective traits if the homework is either excessive or unsuitable, and there goes along with these results a waste of time which might be spent more educationally."

Kidney Troubles

cause poisons to accumulate in the system and bring on persistent Backache, Lumbago or Rheumatism. Take GIN PILLS to help the kidneys eliminate toxic waste matter from your system.

Railways Aid Development

The greatest single factor in the development, not only of Vancouver but of the whole of Canada, had been the Canadian railway system, N. B. Walton, general superintendent of transportation, Canadian National Railways, western region said. He addressed the transportation and customs bureau of the Vancouver board of trade at a meeting commemorating the 100th anniversary of steam railway transportation in Canada.

Cats wag their tails when they're angry; dogs wag their tails when they're pleased; and cows wag their tails to hit you in the eye when you're milking them.

Unbuilt Liner Insured

Large Sum Placed On The Queen Mary's Sister Ship

The Cunard-White Star Line announced that Benjamin Wistlar Morris, New York architect of the firm of Morris & O'Connor, had been retained as a consultant on the decorations of the projected new sister ship to the Queen Mary.

Grey Wormum, a Londoner, who designed the prize-winning building of the Royal Institute of British Architects, on Portland Place, has been appointed decoration architect of the new vessel. Mr. Wormum is one of a committee of three recently appointed to plan London's coronation decorations.

Insurance of more than \$3,250,000 has already been placed by British underwriters on the Queen Mary's sister ship, whose keel will soon be laid at the John Brown shipyard, Clydebank.

This is easily the largest amount ever placed on a single merchant ship in the course of its construction. Brokers in London are confident that the total amount to be accepted in the market will exceed \$3,500,000, thus leaving less than \$1,000,000 to be made up by the government.

Important London companies that declined to participate in the Queen Mary's insurance have taken large amounts on the new ship. A number of large firms in Liverpool, however, have thus far refused to accept their share, although it is hoped that they will come in before the boats are closed.

The coverage will take effect at the beginning of next year and run for not more than 36 months. Building risks are distinct from service risks and apply only while ships are under construction.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarier to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile does not flow, you will feel tired, sluggish, and your food will not digest. It just does not go into the bowels. Gas blows up your stomach. You feel constipated. Bile poisons go into the body, and you feel sour. And the worst of all is that you feel a heavy, low movement down "always get at the name. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Bile makes and purifies. They make the bile flow freely. They do the work of a catalyst but have no alcohol or mercury in them. Ask for Carter's Little Liver Pills by name! Rubikem's refuse to make any claim.

Menu For Eskimo Prisoners

Revised Regulations Sent To Mounted Police In Barracks

If you are an Eskimo and if you are a prisoner of the R.C.M.P. away up in the barracks and if you ask for the menu, this is what you'll get, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday and Sunday:

Two pounds of salt pork, fourteen pounds of flour, seven pounds biscuits, three pounds rolled oats or beans, one pound lard, eight ounces tea, half gallon molasses, four ounces baking powder.

The foregoing rations are per day. They are just announced by the Canada Gazette in a list of revised Mounted Police regulations.

A Cheerful Note

The Lethbridge Herald says the spectre of southern prairie cattle dying by thousands this winter is vanishing. A lot of our cattle have gone to markets east, west and south some for immediate slaughter and the rest for feeding. The open fall has served to allow those still on hand to find their own living. It would appear that we are going to come out of the livestock situation better than we thought.

The Japanese farmer pays from 41 per cent. to as high as 51 per cent. of his income in taxes.

It is said that black horses are affected more by the heat than those of other colors.

Forgery losses in 1928 were estimated at \$200,000,000.

New Helicopter Plane

B.C. Man Claims Test Of Latest Model Is Success

A new type of helicopter flying machine is undergoing final tests by its inventor, John Hess, at New Westminster, B.C. The inventor claims it is the first successful helicopter for all practical purposes; that it can be lifted and lowered vertically in the air.

During the past 15 years Mr. Hess has studied aeroplanes and done a great deal of building and experimenting. He stated tests of his latest aeroplane had been successful, and that the machine could be kept in the air as long as he wished.

The aeroplane weighs a ton and is powered with a 210 horsepower motor. There are two propellers, one in front and the other at the rear, revolving on vertical shafts.

Each propeller has four blades and is shaped like an umbrella. The forward shaft may be thrown into a horizontal position to drive the aeroplane forward once it is in the air.

The secrets of the machine are well guarded. It is the third helicopter made by Mr. Hess. The first was a model and later he experimented with a 100 horsepower motorized machine.

Queer Broadcast Reception

Alberta Folks Hear Musical Program Without Receiving Sets

Mysterious music that "came out of a clear sky" baffled four road workers near Dods, Alta., about 40 miles southeast of Edmonton. They said it was a radio program from Edmonton but there were no receiving sets "for five miles around" where they were working.

Startled by the music, A. J. Thorsley, R. Ojerde, H. Vergette and R. Fietore thought there might be an automobile in the vicinity but search revealed nothing.

They proceeded to a farm house more than a mile distant where they found Mrs. G. Sanstrom who claimed she also heard the music but had feared to mention it, thinking people might wonder about her sanity.

As the workers were making further "investigations," the music ceased as suddenly as it had started, they reported. The music had continued as they walked toward the distant farm house.

The program from nowhere eclipsed the story of the Lindbergh. Ont., farmer who knows the melodies from his stove, and other reports of tunes coming from kitchen sinks.

SHE DREADED GOING UPSTAIRS

Woman's Fear of Rheumatic Pains

One of the many troubles that afflict rheumatic sufferers is the difficulty of getting up and down stairs. Such was the case with this woman, before she started taking Kruschen. "I was in pain and rheumatism in my knees and back and also my head was getting very bad. I used to dread going up stairs, now I am very thankful to say it is no trouble at all and I scarcely have any pains. I feel better in heart than I have done for years."—(Mrs.) G.M.

Two of the ingredients of Kruschen Salt is a rare and their work in dissolving uric acid. Other ingredients of Kruschen assist Nature to expel the dissolved acid from the system.

More Planes For France

Decide To Add 1,500 More Machines

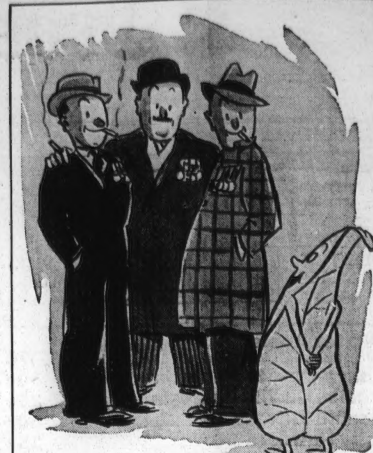

France will add 1,500 planes to her defence units under plans approved by the cabinet and air ministry, it was announced at Paris. The additional planes will raise France's strength in the air to 4,000 of the most modern ships.

The personnel, the air ministry announced, will be raised to 50,000 by the immediate addition of 10,000 men and 1,000 officers chosen from the present non-commissioned officers of the air army and navy corps as well as air corps reserve officers.

An experienced newspaper editor is a fellow who drops the propaganda stuff into the wastebasket before opening the envelope instead of afterward.

Distracted Mother—"Oh, dear, what shall I do with baby?" Young Son—"Didn't we get a book of instructions with it, mother?"

Eight in place of six years has been fixed by Japan as the period of compulsory education.

Boys Of The Roll Brigade

"Marching Along Together" are the wise roll-your-owners who insist on full satisfaction from every cigarette they roll—and get it with Ogden's Fine Cut.

Why not join their ranks? Times are better, you know, and Ogden's is the better tobacco—always cool, mild and fragrant—the one fine cut that always satisfies every member of the "roll" brigade.

Yes, you'll enjoy Ogden's and you'll appreciate the purple easy-opening ribbon that removes the Cellophane on the Ogden's package. Remember, also "Chanticleer" and "Vogue" are the best papers!

SELECTED RECIPES

GINGER COOKIES

1 cup shortening, butter and lard mixed, or all butter
1 cup brown sugar
1 egg
1 cup molasses
1 teaspoon soda dissolved in ¼ cup boiling water
2 teaspoons ginger
5 to 6 cups Purify Flour
Method: 1. Cream shortening mixture and sugar thoroughly. 2. Add molasses, beaten egg and dissolved soda. 3. Sift flour with ginger and add to Mixture No. 2. 4. Turn out on board, roll thinly and cut into desired shapes. 5. Bake in slow oven, at 275 degrees for 10 minutes.

Decorating Ceiling With Stamps

English Barber Uses Thirty Thousand To Work Out Design

"To make his customers 'ceiling conscious' when being shaved, Robert Pattern, an enterprising barber of Worthing, Kent, England, has decorated the ceiling of his shop with 30,000 postage stamps.

The stamps came from all parts of the world, and are arranged in intricate designs.

In the centre is the Worthing coat of arms, and the collector's own "crest," consisting of a pair of scissors, a comb and razor.

An inventor has combined an electric lamp and clock having two upper parts that revolve against a needle, the upper end of which points to hour marks and the lower to minute marks.

There can be no exact scientific definition of an intoxicating drink.

King Edward May Officiate

Britishers Hope He Will Launch New British Liner

King Edward may lay the first keel plate of the \$22,500,000 new British liner, as yet unnamed, which is to be built at Clydebank, Scotland, as a sister ship to the Atlantic blue ribbon holder Queen Mary.

Britishers hope Edward will consent to launch the vessel at Clydebank, 18 months or two years from now, and will name her King George V, the name popular vote has already given the new liner.

Officially the ship is to be known as No. 552 until her launching. She will be of the same dimensions as the Queen Mary, but recent important improvements in marine engineering will be incorporated in the 200,000 horsepower engines.

The Sunflower

Was Used As Food By North American Indians In Early Days

The sunflower, which is cultivated in Canada mainly for feed for birds and poultry, for ensilage as cattle feed, and as an ornamental plant, is generally recognized as indigenous to North America. It was used as food by the North American Indians, the seeds being eaten raw, or pounded and mixed with other seeds into flat cakes which were dried in the sun. In 1615 Champlain found the Indians in the vicinity of Georgian Bay cultivating the sunflower. The oil which they obtained from the seeds was used for their hair.

The cheapest violins are those manufactured in Japan, where the parts are pressed out of wood, instead of being carved by hand.

KING EDWARD IS PLANNING A VISIT TO CANADA SOON

King Edward VIII. is planning a visit to Canada soon after his coronation next May, Prime Minister King indicated as he came back from a European visit.

The prime minister said the King was looking forward to a visit to Canada as soon as possible after his trip to India, planned for almost immediately after the May coronation.

Mr. King said no more about the monarch's proposed visit to the Dominion. It was the first official indication King Edward expected to visit this country next year.

King Edward's trip will mark the first time in history a reigning British monarch has visited Canada. He has travelled through the Dominion a number of times, but before he came to the throne.

His father, King George V., also visited Canada, but prior to his accession.

King Edward's visit to India, preceding the journey to Canada, will be for the purpose of being crowned Emperor of India. A ceremonial Durbar will see him vested as ruler of India's millions.

King Edward will be making his fifth visit to Canada when he travels to the Dominion after his coronation next May. He made an official visit in 1919 when, as Prince of Wales, he travelled from coast to coast. He came again in 1923 and 1924 and 1927 on unofficial trips.

As a quiet young man of 25 he landed at Halifax on his first visit and immediately captured the hearts of the Canadian people. Thousands of persons cheered him.

A strike was in progress in the mining district of northern Ontario at the time and his staff decided it would be safer for him not to visit certain districts. When the Prince found this out he insisted on touring the Porcupine mining country.

The result was the residents gave him a roaring welcome. At Timmins a streamer of bunting straddled a great square outside the station bearing the legend: "This is your town; paint it red or any damn color you like."

In hardly less boisterous fashion the rest of the Dominion greeted him everywhere he went. "Crowds came to stare at the King's son who was scarcely known to them and remained to cheer him to the echo. Everywhere the Prince danced, played golf and won the devotion of Canadians."

He was in Canada again in 1923 as the Earl of Renfrew to visit his ranch in the E.P. ranch in Alberta; in the summer of 1924 he made another unofficial visit to Canada and the United States. The Prince was in Canada again in 1927. That year he accompanied Stanley Baldwin, then as now prime minister of the United Kingdom, on part of the prime minister's tour of the Dominion.

Miners Fatally Injured

Three Men Fall Down Shaft At Kirkland Lake Mine

Kirkland Lake, Ont.—Three men who fell 200 feet from a staging of a shaft in Lake Shore mine were fatally injured. The three were George Cadman, Bert Peterson and Charles Dodson. The men were working by themselves on the raise in the new No. 6 shaft when the accident happened.

Cadman was well known in football circles here and had been prominent in athletics at Cobalt before coming here. Further particulars of the tragedy were not immediately available.

Canada's Trade With Java

Has Been Increasing Steadily For Last Five Years

Windsor, Ont.—Trade between Canada and Java, the world's most densely populated country, has increased every year since 1931, Richard P. Bower, Canadian trade commissioner at Batavia, capital of Java, for three and one-half years, said during a brief visit here. Mr. Bower said Japan and a couple of other nations have enjoyed similar conditions with the tropical island just south of the equator in the Dutch East Indies.

Boy's Gang Broken Up

Winnipeg—A police raid in a north-end shack broke up what was believed a boy bandit gang responsible for numerous robberies here. Loot worth \$1,500 was recovered and five juveniles taken into custody.

Pleased With Results

Europe Expresses Approval Of Re-election Of Roosevelt

London.—In Europe, in the Far East and in South America, re-election of Franklin D. Roosevelt as president of the United States was applauded with few dissenting voices.

London newspapers devoted major front page space to news of President Roosevelt's "weeping victory." The Daily Express exclaimed: "Roosevelt, we think you're grand. Salute!"

In Paris, Leftists and Rightists were momentarily united in expressions of satisfaction.

"If France lives tragic hours again," commented the Leftist newspaper L'Ouvre, "she will certainly have as the head of the great American democracy the man who will be able to do most for her."

Fascist circles in Rome welcomed the Democratic victory partly because Roosevelt is better known than Governor Landon and partly because his energetic action has been frequently applauded by Italian.

Vatican City prelates said Pope Pius was pleased with the results.

In Moscow, Soviet quarters frankly expressed approval because they said President Roosevelt was a known quantity who had shown friendship towards Russia. They voiced the belief his re-election would insure no change in Russo-American relations.

In Shanghai, Chinese political and business circles declared President Roosevelt's international policies were helpful to China and conducive to world peace.

League of Nations diplomats at Geneva, voiced the belief President Roosevelt would wield a powerful influence for the maintenance of world peace.

In Berlin, Roosevelt's victory caused little surprise. What was interpreted here as the president's program for planned economy was regarded sympathetically as in line with similar movements of various European powers.

In Tokio, foreign office circles welcomed the re-election of President Roosevelt, declaring they believe it would favorably affect Japanese-American relations.

In South America, a consensus of newspapers showed the president's return to the White House was desired by Latin-Americans because under the Roosevelt regime the "good neighbor" policy had apparently been made permanent and the reciprocity trade program expanded.

Urges Increase In Trade

Hon. J. L. Halsey Hopes For Extension With Britain

Liverpool.—Hopes for increased trade between Canada and Great Britain were expressed in speeches and messages at a luncheon in connection with the Imperial fruit show.

Hon. J. L. Halsey, Canadian minister of national revenue, recalled the development of the Canadian apple trade since the first trial shipment from Halifax to Liverpool in 1849. In the shipping season 1935-36 Canada exported to the United Kingdom 2,500,000 barrels of apples and 2,500,000 boxes, or approximately 50 per cent. of the entire crop.

"My hope is that the campaign for extension of our trade with Liverpool district and our participation in the Imperial fruit show may result in trade developments beneficial to your country and ourselves and to the whole family circle of the British nations," he said.

Lord Mayor R. J. Hall said they looked upon Canada not only as one of the best customers of the port of Liverpool but as a Dominion with which they were intimately related.

Object To Long Hours

Grain Buyers In Saskatchewan Country Elevators Have Complaint

Saskatoon.—Grain buyers at country elevators, objecting to the long hours of work resulting from trucking, will seek legislation controlling the hours for taking grain into elevators, an organization recently formed intimates. These grain buyers find that grain is now hauled by commercial trucks working day and night in shifts. As a result buyers have been kept at continuous work from 72 to 90 hours at a stretch and have been obliged to grade grain by lamp light, contrary to the Canada Grain Act.

They find that one driver hauls from the threshing machine during the day and another from the farmer's bin at night.

Celebrates Birthday

Ottawa.—Hon. Raoul Dandurand, minister without portfolio in the federal cabinet and government leader in the Senate, celebrated his 75th birthday Nov. 4th.

Another Use For Glass

Scientists Have Been Experimenting With It For Dental Use

Toronto.—A new milestone in dental history is claimed by a little group of scientists who struggled for nine years to perfect the ideal denture base.

Experimenting in a secluded corner of the dental buildings at the University of Toronto, the white-coated trio has foregone holidays and spare time to work on an idea.

Dr. Frank Lott, professor of prosthetic dentistry, unfolded to the Academy of Dentistry the advantages of glass as a base for false teeth plates. He named Dr. A. D. A. Mason, now dean of the faculty of dentistry, and Dr. Irwin Apte, professor of crown and bridge prosthesis, as co-workers in the discovery.

A chief advantage of glass for dental plates is claimed to be its permanency of color and the extremely wide color variation attainable.

For Mission Field

Young Women Graduates Of Brandon College To Engage In Foreign Work

Toronto.—Two young women graduates of Brandon college and a graduate of McMaster University will leave Toronto to work in foreign mission fields. They are Miss Clara Johnson, Edmonton, and Miss Gertrude Bonner, Toronto, who will sail for India shortly, and Miss Susan Gilmour, Regina, bound for Bolivia.

The missionaries are guests at the diamond jubilee meeting of Women's Baptist Foreign Missionary Society of Toronto West.

TRAINING SHIP TO BE BUILT FOR CANADIAN NAVY

Ottawa.—The Royal Canadian navy is going into sail. Henceforth Canadian bluejackets will be required to be more than "sea machines." They are to study seamanship from the bottom up, be able to handle ropes and spars, know which is the job tops and which the stays, and understand what to do when ordered to take in a hitch.

Unperturbed by rumors of extensive construction of modern battleships, the naval wing of the defence department is building a schooner at Metcalf, N.S. A trim craft, this reinforcement will carry little, if any, armament—probably a couple of two-pounder guns for saluting purposes. The department will employ her to resurrect within the naval personnel the forgotten art of handling a ship that is not equipped with electric bells, motor-driven winches and all the gadgets which have converted the modern man of war into a machine shop.

"It is fundamental that sailors should know how to sail," said one departmental authority here. "They should know how to work aloft, know what the wind and the sea do to a ship; and these things cannot be learned from a book."

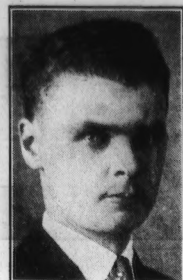

Henceforth the Royal Canadian Navy has lacked a training ship designed for instruction in the essentials of seamanship; but this is now being rectified.

WOUNDED SPANARD ON ARAGON FRONT

Two members of the Government forces helping a wounded companion after having taken the village of Argula.

SUCCEEDS DR. ANDERSON

J. G. Diefenbaker K.C., of Prince Albert, who has been selected as leader of the Saskatchewan Conservative party in succession to Dr. J. T. M. Anderson. He is a native of Grey County, Ont., but has lived in the West since childhood.

Ice Blocks Supply Ship

Goldfields Residents Will Have To Wait For Air Transport

Regina.—Menaced by river ice, the Hudson Bay Company ship "Pelly Lake," carrying supplies to Goldfields on Lake Athabasca, has been forced to turn back, and Goldfields residents will be without additional supplies until air transportation is reopened.

It is expected that air transport will be resumed within two weeks. The town will be faced with shortages of some commodities, and extreme rationing measures are possible.

Word of the failure of the ship to get through reached Hon. T. C. Davis, K.C., attorney-general, by wire. Northern waters are reported freezing over quickly, and it will be impossible to attempt to get through by boat until spring.

Aviation Inspector Dies

Howard C. Ingram Succumbs In Regina Hospital

Regina.—Howard C. Ingram, 39, inspector of civil aviation in the west, died in the general hospital from a heart condition, septic endocarditis, bringing to a close a career long associated with prairie aviation. Identified mostly with Moose Jaw, he lived variously in Regina and Edmonton, but his work took him by air to all points in Saskatchewan and Alberta.

Mr. Ingram had been ill only a few days, when he collapsed and was taken to hospital.

Howard Ingram is survived by his widow and one daughter; by his brother, George C. Ingram, and a brother, George L., both of Regina.

Call For Volunteers

Recruiting In England Met With Shower Of Pacifist Pamphlets

London.—A shower of pacifist pamphlets interrupted a call for army volunteers by War Secretary Alfred Duff Cooper in the Wimbledon town hall.

Duff Cooper's speech at the presentation of a prize to the Fifth Battalion, East Surrey Regiment, was almost drowned by heckling from the galleries. Pacifist pamphlets were thrown down on the audience and distributed at the door.

Transient Tells Story

Rides In Sealed Freight Car From Vancouver To Toronto

Toronto.—Joe Moore, 28-year-old transient, who survived a one-week ordeal of being sealed in a refrigerator car, was well enough at Western hospital to tell his story.

Moore said he had climbed into the freight car on a Vancouver dock to sleep. When he awoke, the car was sealed and he knew not where. With nothing to drink and only green peanuts to munch, cold and hunger overcame him before the journey ended in Toronto.

He was found in the freight car when the car was unsealed at a siding here prior to removing its cargo of peanuts.

Moore said he had no relatives in Canada, having come from Poland several years ago. During the summer he had worked as a farm hand at Dauphin, Man.

He had been in a Winnipeg hospital until recently, jumping a freight car for Vancouver the day he was released. Having no money when he arrived at the Pacific coast city, he climbed into a freight car on the wharves and went to sleep.

Sets Precedent

Woman Member Moves Address Thanking King For Speech

London.—Miss Florence Horburgh, senior member for Dundee and a Conservative, made history when she moved the address thanking the king for the speech from the throne. It was the first time this task had been entrusted to a woman.

Miss Horburgh wore a brown evening dress. She appeared remarkably self-composed as she dealt in detail with the speech.

She was warmly applauded, particularly when, speaking for the women of Great Britain, she said:

"If ever the time comes again when women wait and men fight, one great suffering we demand we shall not undergo, namely, that human lives should be sacrificed because due preparation was neglected."

Canadian Growers Win

Victorious In Apple Exhibits At Imperial Fruit Show

Ottawa.—Nova Scotia and British Columbia growers were victorious in 13 classes of apple exhibits at the Imperial Fruit Show held at Liverpool, Eng., according to the prize list received by the department of agriculture. Besides the 13 first prizes, growers from the coastal provinces scored several seconds and thirds. Ontario and Quebec, where a large volume of apples is also grown for export, did not compete.

INTRODUCE BILL FOR PERMISSION OF MERCY DEATHS

London.—A "mercy death" bill to permit medical men to kill incurable patients was introduced in parliament.

It was presented by Lord Ponsonby, by climaxing a year's campaign by many medical and church leaders for euthanasia—their term for "easy death."

It would enable physicians and surgeons legally to put to death patients suffering great pain from conditions diagnosed as hopeless.

For almost a year there has been growing controversy in Britain over "mercy deaths." Advocates have included some of the highest medical authorities of the realm who organized a "euthanasia society."

Opposition was voiced universally by leaders of the Roman Catholic church.

Reaction was more sharply divided over the London Daily Mail's account, on Nov. 7, 1935, of a physician's "confession" of five "mercy deaths."

The newspaper, which described the doctor as "a kindly-faced, elderly family doctor," said he told of having put to death a newly-born baby "doomed to imbecility," and four adults suffering incurable diseases.

Agitation for legalized "mercy deaths" soon became widespread, under the leadership of the late Lord Moynihan.

Dean Inge, former dean of St. Paul's, led English churchmen supporting Lord Moynihan.

The strongest opposition came from high Catholic churchmen. "We have no right to take over people's lives," said Dr. Peter Amigo, Catholic bishop of Southwark, South London diocese, "in my view it is good to suffer purgatory on this earth."

BELIEVE DAY OF THE BATTLESHIP IS NOT YET OVER

London.—The battleship versus bomber controversy remains basically unsettled, according to the report of a sub-committee on Imperial defence published recently.

The report emphasizes the necessity of further exhaustive experiments but says that on the basis of present knowledge the battleship appears an essential part of a navy operating on the high seas.

The sub-committee consisted of Sir Thomas Inskip, minister for co-ordination of defence; Viscount Halifax, lord privy seal; Malcolm MacDonald, dominions secretary; and Walter Runciman, president of the board of trade.

The admiralty does not claim battleships are invulnerable to air attack, says the report, but that modern improvements in the protection of anti-aircraft gunnery make them at least no more vulnerable to bombing than to gunfire. Value of anti-aircraft fire, however, is most difficult to estimate on the basis of present experiments and further trials are necessary.

It is estimated the capital cost and upkeep of a battleship over its normal life is equivalent to that of 43 medium bombing planes. The report draws attention to the necessity of protecting naval bases against concentrated air attacks.

A summing up of information available at present leads the sub-committee to believe the day of the battleship is not over and that to cease building them would lead to grave risk of disaster.

U.S. Unemployment

Believe Roosevelt Will Attack Problem Along N.R.A. Lines

Washington.—Late returns emphasizing the epochal endorsement of Roosevelt policies at the polls reinforced the opinion of many here that another attack on the United States unemployment problem along N.R.A. lines is in prospect.

How soon the move may come, what form it may take and the possible effects on party alignments were foremost topics in ranks both for and against the administration as the president's re-election plurality approached 10,000,000.

Awaiting his triumphant return to the capital, officials were reluctant to discuss the probable program for publication. But data was being accumulated for Roosevelt's consideration in drafting his message to the opening of congress and his inaugural address on Jan. 20.

Inquirers were referred to his campaign speeches and the Democratic platform for light on what he might say.

It was recalled he praised N.R.A. as an instrument of progress. While calling the emergency over, he was clearly mindful of the heavy relief burden and the necessity for reducing the ranks of an estimated 11,000,000 unemployed in the budget-balancing he promised was to be realized.

The Democratic platform pledged to seek a "clarifying amendment" to the constitution, unless ways could be found to handle wage and hour problems and ban "unfair business practices" within the constitution as it stands.

Cause Of Death Unknown

Toronto.—Thomas P. Moss, Toronto student at Oxford University whose burned body was found in a haystack near Bath, England, several months ago, left an estate of \$13,607, it was learned here. British police were unable to determine whether Moss died accidentally or was victim of foul play. The estate was left to his mother.

Appointed Chief Justice

Ottawa.—Mr. Justice C. W. Macmillan of the appellate division of the Supreme Court of Alberta, has been appointed chief justice of that division, succeeding Chief Justice W. C. Simons, who is retiring. Announcement of the promotion was made by Hon. Ernest Lapointe, minister of justice.

Shingle Mill Destroyed

Vancouver.—The northside mill of the Burrard Shingle Co. was a mass of charred ruins following a night fire which also burned down two 30,000-volt power circuits, cutting off electric power lines to North and West Vancouver and Howe Sound settlements for more than eight hours.

TODAY'S THOUGHT

There are hopes, the bloom of whose beauty would be spoiled by the trammels of description; too lovely, too delicate, too sacred for words, they should only be known through the sympathy of hearts.

—Dickens.

BETWEEN OURSELVES

LET us have a little friendly chat between ourselves this week, in regard to our local paper. Has it ever occurred to you, dear reader, what benefit it is to have in your community a weekly paper, that has the interests of the district at heart, that chronicles all happenings, and strives at all times to brighten up the life of the community as a whole. Many districts today that are without a weekly would be eager and willing to do their utmost to have one.

To help make your paper a better one, the readers and subscribers can do much, for instance:

- (1) By keeping the Subscriptions paid up to date,
- (2) By supporting the Advertisers, and mentioning, they saw it in the Chronicle.
- (3) By interesting non-subscribers to take out a subscription, and swell the circulation list.

Bigger circulation means more national advertising, better results for the local advertisers, and the adding of a further page of home-print. We have been asked often to add another page, but to do this, means that we will have to have more advertising and before we can get this, we require a bigger circulation.

After all, when you come down to figures, what does your Chronicle cost you, less than three cents per week, not a big sum is it, and by helping us, as suggested, you are helping yourself and your district, make a brighter and better paper, and putting more money in the district for distribution.

It must be borne in mind that we try to please all our readers, but every reader is not of the same taste and mind, and that, in all possibility, there may be some items you don't like that the other fellow does, and vice versa.

At this time we are becoming concerned with the steadily increasing amount of past-due subscriptions, and to those in arrears we say this, if you cannot take up the full amount of your indebtedness, pay now (today) what you can, thus helping us as we have helped you. Think this over, for, every dollar collected now means a great deal to us, means a great deal to those who are waiting for our money, means the paper will carry itself and not embarrass us by having to draw on other sources to keep the paper to the fore.

We make this appeal knowing fully well that you will respond in your usual Prompt and good way, and that it cannot be said ever, that the Chronicle readers fell down on their job.

CROSSFIELD DISTRICT

JUDGING our little Community and District (although they say comparisons are odious) we find that citizens of Crossfield and District do their bit equally as well, if not better, than many communities three or four times its size.

Take the number of appeals that are made throughout the District yearly, and see how well they are responded to, even though times have been hard in the past few years, no worthy object has failed to obtain support.

Churches have Teas, Bazaars, Sales of Work, Concerts, etc., this Society has this, that Society has that, all appealing for funds and assistance, and though one has continually to keep putting his hand in his pocket, nevertheless, something is always donated towards the cause.

Sporting activities also receive their share of support, as evidenced by the way the Midgets were helped to carry on, the Sports Day on July 1st, and a host of other things we could mention.

If one was to summon up, at the end of the year, just what they had contributed to one cause and another, and this could all be tabulated, it would amount to an enormous sum in the aggregate.

It is good to be a member of a District such as this, and one should feel that, though they can only help in a little way, this effort is of much value as those who can afford more.

Let's keep this spirit always in Crossfield and District and may it long continue to be our chief asset, this "Helping the Worthy Cause," so that we make our Community that Bright Spot worth living in.

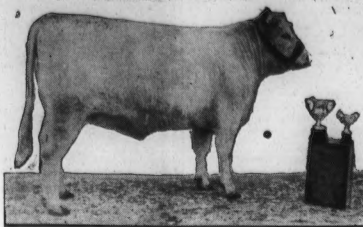

Orfiss Kolumm

P. D. Sez.

What a paradox is woman. Her strength is her weakness. She challenges by faltering, she fights by yielding, and she conquers by falling.

Sweeps the Boards

This Heifer, bred and raised by R. J. Hendry of Crossfield, from his famous Shorthorn Herd. Sold to George Fairweather, young Simon's Valley dairy farmer, it swept the boards at the second annual show of the Junior Beef Feeding Club of that district, held in Calgary during the week of the Fall Show and Sale. This heifer, shown above, was adjudged champion and after winning top prize-money and the handsome trophy award of the Union Packing Company, it was sold to the T. Eaton Co. for 25 cents per pound. It weighed 940 pounds, and triumphed in a class of 18 exhibits.

The animal was fed Dr. McClelland's Iodized Mineral Supplement. It pays to feed a good mineral. Look for this seal and be sure of the best. Dr. McClelland's Supplement always bears this seal.

GOSSIP and GRUMBLES

Happy McMillan is dieting. He says two square meals is enough for anyone.

Armistice Day was November 11. Yes, and also the birthday of our local Veterinary Surgeon.

The Scarecrow creeps. Yes and the human Frog walks also. At least, so some of the ladies at the C.D.S. Social, claim.

The Board of Trade Vice President still playing baseball. At least he was looking for a pinch hitter, for Drummiller.

Bert Bannister is strong for Ether. Ether way you like to have it, Radio or otherwise.

Harry May busy on Legion work. In the language of the Army, "Still muckin' abbat."

Our reporter gone colour blind, November 12, trying to report the colours of the new gowns worn by the fair Sex at the Armistice Ball—did it.

Nyal Tweedle fixing brother Dean's automobile—another teacher in trouble.

Have you made a trip yet on the C.P.R., "Chinook", if not, try it soon, it's worth while. Ye Editor had his first one Wednesday.

HERE AND THERE

Famous officers of the Canadian Pacific Railway and Sir John A. Macdonald, Prime Minister of Canada, arrived at Revelstoke recently and held a series of historic meetings. Among them were Donald A. Smith, George Stephen, James J. Hill, Van Horne and Shaugnessy, names associated for the past half century with the construction of Canada's first transcontinental railway. The party actually comprised a group of film players portraying the historic characters in the tense board-room sequence of "The Great Barrier", Gaumont British picture depicting the strenuous railway construction days fifty years ago.

Says Gene Sarazen, one time world's champion golfer, writing of the Banff Springs Hotel course at the famous resort in the Rockies:—"That course of Banff is everything you said. Miss Helen Hicks and I played it against two guests at the hotel and we were beaten. With a huge gallery it may seem funny to hear we simply couldn't keep our minds on the game—the scenery was simply too much."

The first 1937 world cruise to set out from New York will be the Canadian Pacific liner Empress of Britain which will sail January 9 for a voyage of 125 days, covering 30,000 miles and visiting 28 ports in 22 different countries. Among these countries are Palestine, Egypt, India, Ceylon, Malaya, Archipelago, the Philippines, China, Japan, Hawaii and back to New York via California, the Panama Canal and Havana.

ANNOUNCEMENT

WE ARE NOW OPEN FOR BUSINESS

Tires and Tubes Our Speciality

O. K. GARAGE

E. W. HOOVER, Prop. "Atlas" Tires-Tubes-Batteries.
YOUR BUSINESS IS SOLICITED

WAYS TO KILL A CLUB

1. Don't come to the meetings.
2. But if you do come, come late.
3. If the weather doesn't suit you don't think of coming.

4. If you do attend a meeting, find fault with the work of the officers and other members.

5. Never accept an office, as it is easier to criticize than to do things.

6. Nevertheless, get sore if you are not appointed on a committee, but if you are, do not attend committee meetings.

7. If asked by the chairman to give your opinion regarding some important matter, tell him you have nothing to say. After the meeting, tell everyone how things ought to be done.

8. Do nothing more than is absolutely necessary; but when other members roll up their sleeves and willingly, unselfishly use their ability to help matters along, howl that the association is run by a clique.

9. Hold back your dues as long as possible, or don't pay at all.

10. Don't bother about getting new members. Let the secretary do it.

11. When a banquet is given, tell everybody money is being wasted on blowouts which make a big noise and accomplish nothing.

12. When no banquets are given, say the association is dead and needs a can tied to it.

13. Don't ask for a banquet ticket until all are sold.

14. Then swear you've been cheated out of yours.

15. If you get a ticket, don't pay for it.

16. If asked to sit at the speakers' table, modestly refuse.

17. If you are not asked, resign from the association.

18. If you don't receive a bill for your dues, don't pay.

19. If you receive a bill after you have paid, resign from the association.

20. Don't tell the club how it can help you; but if it doesn't help you, resign.

21. If you receive service without joining, don't think of joining.

22. If the club doesn't correct abuses in your neighbor's business, howl that nothing is done.

23. If it calls attention to abuses in your own, resign from the club.

24. Keep your eye open for something wrong, and when you find it, resign.

25. At every opportunity threaten to resign and then get your friends to resign.

26. When you attend a meeting, vote to do something and then go home and do the opposite.

27. Agree to everything said at the meeting and disagree with it outside.

28. When asked for information, do not give it.

29. Cuss the club for the incompleteness of its information.

30. Get all the club gives you but don't give it anything except h-l.

31. When everything else fails, cuss the secretary.

High School Corner

(Conducted By W.K.G.)

THE NIGHT OF DEC. 23rd.

At the invitation of the Crossfield Dramatic Society, the High School will present, on December 23rd, in the U.F.A. Hall, a dramatization of Dickens' charming classic, "A Christmas Carol".

This ambitious attempt on the part of the High School is made for two reasons. First, because this story, when told in the spirit in which it was written by Dickens, offers the best in all-around Christmas entertainment; and secondly, because such activity on the part of the students, is in entire accord with the new requirements of the Department of Education.

We have come a long way in our educational programme since the time when the three "R's" were considered the sole scope of the school. To-day we realize that that which is artistic, and that which affords the students an opportunity to develop his own powers and his unique personality is at least quite as important as his purely academic training.

Throughout this entire story, "A Christmas Carol", we are dealing almost entirely with the subjective element, and it is never easy to present to the physical eye, the memories, the remorse and the aspirations which make up our varied mental and emotional experiences. However, we have the confidence that our transcription of the story, and our adaptation of it for production by our school will afford our audience the type of entertainment which will meet their approval.

There will be a matinee in the afternoon of the 23rd. This will be given without cost of admission for the entertainment of all school children who care to come, including those of the country school districts. The seats for the night performance will be reserved. We suggest that you get properly tuned-up for Christmas by seeing this play.

World's Largest Telescope Being Built In California Will See Billion Light Years

Plans for California's 200-inch telescope, which will make this world's largest "eyepiece," a structure resembling three five-story buildings fitted together like sticks crossed to a kite, have been announced in New York.

It was announced also the astronomers who "ride" this telescope will have a flying field on top of their observatory mountain in California so they can fly to work.

The plans were described at a meeting of the American Institute for the study of the telescope, loaned by the navy to be supervising engineer of the erection of the \$6,000,000 telescope.

The 200-inch "eye," huge glass mirror which the telescope will carry, is already at the California Institute of Technology at Pasadena being ground. It should be finished in 1940, Captain McDowell said.

But the unique, new structure which will form the body of the telescope is expected to be fabricated by next July. The giant is one of the simplest pieces of astronomical engineering ever planned. It is in three main parts—a tube, a tuning-fork-shaped yoke and a horseshoe. The tube, which is the barrel of the telescope, is to be five stories high, by 22 feet in diameter, a steel framework with no covering.

The fork is a steel skeleton. To support the higher end of the fork there will be a new structure in astronomy, a horseshoe of steel, nearly five stories high. The top, open end of this horseshoe will be bolted to the elevated end of the tuning fork. The result will be a telescope which can be rotated in any direction and pointed in any direction in the sky.

This great mass—580 tons—will float on oil. The oil will be under a pressure of 280 pounds to the square inch. It will be a thin film distributed over two supporting spaces or bearings, each with an area of 25 square feet.

This telescope, Capt. McDowell said, will see 1,000,000,000 light years out into space, more than twice the distance now plumbed.

An astronomer will be able to step out of his observatory on top of Mt. Palomar in California and into a plane on flying field alongside the telescope to carry his information to the laboratories which have been erected 90 miles away at Pasadena.

Says Northern Route Safe

Greater Development Of Bay Route Can Be Expected

Back from charting Hudson Bay and Labrador waters aboard the Dominion government survey ship Acadia, J. U. Beauchemin, noted cartographer in charge of the expedition, said he was convinced the northern route to western Canada would be successful.

"With all the information navigation experts now have in hand," he said, "the chances for greater development of the northern route are exceedingly good."

"Danger from natural obstacles such as icebergs and strong Arctic currents has been reduced by government maintenance of an ice-breaker on the route which advises navigation of the location of hazards."

Wool Growers Organize

Sheep Men Becoming Alarmed Over Increase In Synthetic Products

In an effort to combat the inroads made by synthetic products such as rayon or artificial silk, wool-producing organizations in New Zealand, Australia, South Africa and Argentina are undertaking a research and educational campaign to develop and bring to the attention of consumers the natural advantages of wool. World production of artificial silk last year reached one billion pounds and Italy is experimenting in the production of synthetic wool from casein, according to the Industrial Department of the Canadian National Railways. At the present time, the world's wool clips are being absorbed without any undue carry-over.

The Grading Of Butter

It is very gratifying to learn from recent statistics regarding butter making in Canada that the bulk of the products is of a high grade. In a total of 1,555,033 boxes of pasteurized creamery butter graded, 1,310,268 boxes, or 84.28 per cent, were of the highest grade. That, comments the Bramford Examiner, certainly speaks well for the operation of the present law in Canada, which requires all butter to be graded.

Value Of Cheese

An Economical Food That Is High In Food Value

Much has been said and still could be written extolling the merits of cheese. The Milk Utilization Service, Dairy Branch, Dominion Department of Agriculture summarizes the most important facts about cheese for the interest and benefit of everyone in Canada.

Cheese is a Canadian dairy product.

Cheese supplies the highest quality body building material (protein) for the growth and repair of tissues. Cheese, like milk, ranks first among foods as a source of tooth and bone building material (calcium).

Cheese contains fat in a highly concentrated form for heat and energy.

Cheese is an abundant source of health-promoting vitamin A.

Cheese dishes are an excellent means of providing the protein in the meal.

Cheese is an economical food—high in food value—low in cost.

Cheese can be used to advantage as a substitute for more expensive protein foods.

Cheese adds flavour when used with bland foods such as rice, spaghetti and potatoes.

Cheese, a highly concentrated food, should be served with bulky foods such as cereals, fruits and green leafy vegetables.

Cheese is a highly nutritive food, not a condiment.

Not Always Helpful

Doctors Say Injuries Often Complicated By Unskilled Aid

The innocent bystander who attempts to aid a person injured in an automobile or other accident was warned by members of the American College of Surgeons the best thing he can do is to do nothing.

Unless an injured person is in imminent danger of further injury he or she is best left exactly in the position and on the spot where injured until a physician or surgeon arrives, since attempts to aid generally result in complicating the injury, the surgeons declared.

The advice emanated from a symposium on fractures held as part of the 26th annual clinical congress.

Dr. Robert H. Kennedy of New York City pointed out from 1,000,000 to 1,500,000 fractures occur annually in the United States and in a large number of cases "helpful" attempts of untrained persons vastly increased the injury.

Just A Family School

Has One Student For Each Of The Eight Grades

Prince William Station on the main line of the Canadian Pacific Railway, 15 miles east of McAdam, New Brunswick, boasts of a school built just for one family—the eight children of Mr. and Mrs. Ross Jamieson. There is a student for each class from grade one to eight. Jamieson holds five jobs, farmer, postmaster, mail stage driver, tax collector and express agent. Because there is no accommodation for her at Prince William Station, the teacher, Lydia Pheneay, daily commutes from McAdam and back.

Had His Own Reason

H. G. Wells, who has just celebrated his 70th birthday, is well known to have his own ideas of Utopia. He is sometimes surprised to find other folk have theirs. At a dinner some years ago he discussed world-betterment with his neighbor, when the latter asserted, "I maintain that all water for drinking and culinary purposes should be boiled at least an hour before use." "Ah, then, you are a doctor, I presume," said Mr. Wells. "No, sir," was the reply, "I am a coal merchant."

Good And Bad Music

"A certain type of music comes to us under excitement," remarked Fritz Kreisler, violinist-composer, returning from Europe. "Jazz is the expression of primal instinct. Don't think jazz is bad. There is good and bad music, and do you think all classical music is good? Who can tell? A gifted man like Gerhart, had he been born in some other environment, might have written great symphonies."—Literary Digest.

Hans Christian Andersen, author of children's fairy tales, is said to have disliked children. 2178

MEMORIAL TO KING ALEXANDER IN PARIS

This memorial to King Alexander of Yugoslavia, who was assassinated on French soil, is being erected in Paris, the finishing touches to be completed this month. The sculptor is Real de Sarte.

A New College Course

University Of Ottawa Starts School Of Political Science

A school of political science to accommodate both regular and occasional students has been opened by the University of Ottawa. Lectures will be given in the evening.

In announcing the new school, the university said: "The purpose of the school of political science is essentially a practical one. It is to prepare candidates for important Canadian administrative positions, for example in the departments of external affairs, trade and commerce and finance."

"Moreover, the object of the school is to offer, in the capital itself, a course of study strictly Canadian in principle, which, taking into account foreign doctrines and methods, will bear consistently on the comprehension of our own problems."

A New Milk Container

Invention Of Swiss Is Now Under Test At Ottawa

Prospect of keeping milk and cream fresh in their natural state for months is offered by a container under test by department of agriculture officials at Ottawa. The container is the invention of Joseph Hofius, a Swiss.

A number of the containers, which had been sealed in Berne, Switzerland, six weeks before, were opened in the presence of several officials. Preliminary finding was that the cream and milk was fresh and sweet.

The University of Oxford, in England, is said to have been founded by King Alfred in 872.

The birch tree sheds its bark annually.

Origin Of Old Term

Red Herring Were Used To Furnish Artificial Trail In Hunting

In the U.S. election campaign, as oftentimes in our own political battles, we hear of "red herrings." Where did the term originate? The New York Times enlightens us: A red herring is a herring cured with salt-peter and slowly dried so as to be red. As early as the 17th century red herrings were dragged over ground to furnish an artificial trail for hunting dogs. They were also dragged across natural trails to divert dogs in a desired direction. Hence allusively or figuratively, the phrase came to indicate the diversion of attention from a real question.—Lethbridge Herald.

Comparatively Modern

Chairs Came Into Common Use In Seventeenth Century

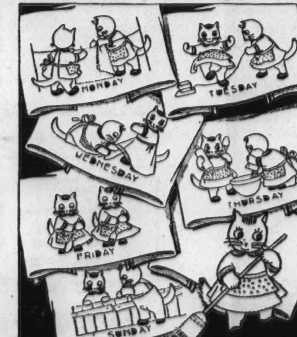

We take chairs for granted, but they were not in common use until the last part of the seventeenth century. Hard wooden stools were the only seating conveniences used before that time.

In museums you may see some of the first chairs of history. They are stiff, uncomfortable objects of Puritan austerity. The backs are of solid wood, often in carved design, and the seats, too, are solid. They were known as "walnut" chairs.

Planning For Dog Derby

Yelps of mushing dogs will be heard along snow-covered highways about Ottawa again this winter for the first time in five years. Plans for an international dog derby, first held there since Emile St. Godard of The Fox, Man., won in 1931, are being formulated by the Ottawa Valley Sled Dog Association.

Kitten Pals Make Light Of Chores

PATTERN 5634

"What's one without the other?" query the Kitten Pals, who always keep house together. Embroider and donate a set of these day-of-week tea towels to your Church sale and see if they aren't sure-fire sellers! Or present them to a bride-to-be, for her hope chest. It's such fun to thread your needle with gay bits of cotton floss, and pattern the simple outline stitch that brings out all seven motifs. In pattern 5634 you will find a transfer pattern of seven motifs averaging 6 7/8 inches (one for each day of the week); color suggestions; material requirements; illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (preferably) to Household Arts Dept., Winnipeg Newspaper Union, 178 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Main Reason For The Depletion Of Wild Fowl Is Reclaiming Of Marsh Land

Meat Survey

Per Capita Consumption Of Lamb In Canada Lower Than United Kingdom

With the object of obtaining more accurate information than is now available on the consumption of meats, particularly of lamb and veal, in Canada, a survey is now under way in the cities of Saint John, N.B., Montreal, and Vancouver, states the Economic Analyst issued by the Economics Branch of the Dominion Department of Agriculture. The Provincial Department of Agriculture in the provinces concerned are co-operating with the Economics Branch in these studies and it is believed that the consumption of various meats differs in families of different national origins and with different family incomes. Few actual facts are available, however, as to the facts on consumption are essential to the most intelligent production of the kinds of meat consumers require.

In the present survey, householders will be interviewed by young college graduates, most of whom have had training in household science, and questionnaires relating to the use of lamb, veal, and other meats, as well as the consumption of fish and eggs, in the various homes will be obtained. Householders will be asked to state the quantity of different meats, fish, and eggs used per month, and their opinions as to the value of them. An opportunity to obtain information in the form of charts and bulletins of beef and lamb cuts and how to prepare them for consumption in the home will also be given to every householder interviewed.

Millient and Irene Finley in Nature Magazine find what seems abundant reason for the disappearance of a part of our wild fowl and also for the abandonment of hundreds of farms that were never meant for farms. They say:

Years ago it was the plume and market hunters that we thought meant the end of the birds. This was like a mere visitation of the maelstrom, soon cured. With the coming of the land promoter, a more insidious disease fell upon the feathered residents of the lake. It was a canker in Nature's balanced system, a schemer who persuaded U.S. state and county governments that vacant desert lands could be turned into prosperous farms, that ponds and marshes could be drained and would add agricultural wealth to the communities.

In this period, civic organizations, chambers of commerce and even the railroads fell in with the idea of inducing settlers from the Middle West and the East to go out and locate on remaining public lands throughout the dry sagebrush country and especially in the submerginal areas. The Common sense would have told even a casual observer that these were not fit to support families.

So this promotion fever swept through the western country, eating away the feeding and nesting places of the migratory flocks. Water birds could not live without homes. This false land promotion was an epidemic.

The picture that followed this land promotion flurry was one of desolation; deserted shacks with a few starving cattle standing expectantly at the back door; deserted schoolhouses with owls roosting in the bellfry; wind-blown sand sweeping across the bleak spaces—lonely, lonely. It was a pathetic ending of the efforts of misguided men to make homes.

The conditions described above pertaining to the United States are more or less equally applicable to many areas in Western Canada.

Dirigible Has Made Good

May Be Best Answer To Ocean Travel By Air

Just recently the Hindenburg docked at her home port of Frankfurt after her tenth and, for this season, her last round-trip passage of the Atlantic. No ocean liner could have exceeded the regularity of her comings and goings during which she has transported more than 1,200 passengers in both directions between this country and Germany. Her speed of flight cannot compare with that of the clipper ships, but there were no pauses to refuel en route, no postponements of take-off to avoid storms. She has ranged from Iceland to the Azores in making her way around disturbances that would have grounded any heavier-than-air rival, but without discomfort or serious delay to her human cargo. If her average speed was little better than that of a crack express train more than made up for it in the elapsed time of her uninterrupted voyages.

It is far too soon, of course, to say that the dirigible is the better answer to ocean travel by air. But certainly it is not too soon to insist that we give the dirigible an even break of encouragement to develop her potentialities. Tragic experiences with home-built models should not blind us to the challenge in the record of the Hindenburg.—New York Herald Tribune.

Making Themselves Useful

Breeders of goats declare that the common belief about their favorite animals eating tin cans, red flannels, ploughshares and such, is without foundation. In fact, goats, we are told, are rather fastidious in their eating habits and demand the best in everything. A later report credits goats with eating and thus destroying large patches of poison ivy, and it is this report is satisfactorily confirmed these lowly and formerly despised animals will be given an exalted place.—Farmers' Advocate.

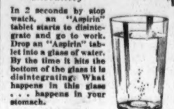

"But the League has failed, we are told. The League of Nations has not failed. What has failed is the nations of the League—and, those outside of it."

Growing children should consume at least one quart of milk daily; adults at least a pint.

Sweetbreads are usually the pancreas or thymus of calves.

To Quickly Ease Pains of Rheumatism

"Aspirin" Tablets Dissolve Almost Instantly

Ask Your Doctor About "ASPIRIN"

Any person who suffers from pains of rheumatism should know this: Two "ASPIRIN" tablets, taken with a full glass of water, will usually ease even severe rheumatic pains in a remarkably short time.

Ask your doctor about this. He will probably tell you there is nothing better. For "Aspirin" tablets not only offer a potent analgesic (pain reliever), but start going to work almost instantly upon the cause. Note illustration of glass.

Try this simple way. You'll be surprised at how quickly pain eases. "Aspirin" tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Corporation, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get—ASPIRIN
LOOK FOR THE BAYER CROSS

WORLD HAPPENINGS BRIEFLY TOLD

Sister Emma Durham, 88, who nursed Alfred Lord Tennyson, the English poet laureate, through serious illness, died recently in London.

Viscount Halifax, lord privy seal, said in the house of lords that, so far as we are concerned we are always ready to return to full relations of friendship with Italy.

The Canadian Daily Newspaper Association held its semi-annual meeting at Ottawa recently, with 25 directors present, representing daily papers from coast to coast.

Germany's second 26,000-ton battleship since the war is fast nearing completion and will be launched before the end of the year, it was disclosed.

A Jerusalem court sentenced three Arabs to death, and three others to the gallows of a British army officer and two for the death of a British policeman during recent disorders.

Shipping men said they expected a total of 10,000,000 bushels of Argentine corn will have been transhipped in the port of Montreal for United States consumption by the time the present navigation season ends.

The "Gazet Van Gent," one of the world's oldest newspapers, will cease publication at Ghent, Belgium, because of financial difficulties on Jan. 1, 1937, after 270 years of existence, it was reported.

May Be Explanation

Is it strange that some have wondered if the cruelties and brutalities associated with the popular pastime of bull-fighting have made the average Spaniard less sensitive of such atrocities as those that have characterized the present civil strife? Cruelty to animals, practiced, or witnessed without protest, inevitably deadens every finer human characteristic.—Our Dumb Animals.

Off On Northern Patrol Work Of Mounted Police Is Not All Man-Hunting

Somewhere up on Ellesmere Island, within the shadow of the North Pole, two members of the famous Canadian Royal Mounted Police are fighting their way to within about 100 miles of the top of the world. Until next July they will be cut off from any contact with humanity.

They will be engaged in a routine job, about which they will make a brief, matter-of-fact report, but they will be encountering dangers and hardships such as famous explorers are wont to write voluminous accounts of.

These two officers are the regular patrol from Craig Harbor northward to the Bache Peninsula. Their work is largely scientific, and furnishes a striking example of diversity of labor—ranging from man-hunting to science—engaged in by the Royal Mounted in the far north.

They spend much of their time preparing reports on weather and ice conditions, and animal life, for the scientists back in civilization. Occasionally they have to take a hand in rescuing some explorer. The average Royal Mountie in that part of the world is a jack-of-all-trades.

Here are some of the things he must be besides a policeman who "always gets his man":

Cornet, deputy sheriff, commissioner for taking affidavits, receiver of income tax, agent for the mining recorder, registrar of vital statistics, amateur physician and surgeon, weather reporter, shipping reporter, ice drift reporter, watcher for collector among wild animals, collector of strange biting bugs for examination by experts, collector of plants for expert study and reporter of the migrations of caribou.

One young officer not long ago had to amputate the inferior arm of a trapper who had been badly hurt in the wilds. The mountie had no other instrument than a jackknife and no anesthetic, but it was a case of life or death and he did the job. He then rushed his patient dog sled to a doctor in a distant settlement—and the patient recovered.

One of the regular duties of the mounties is to keep an eye on the trappers. Men go mad up there in the howling wastes.

"When we approach a trapper's hut," one mountie said, "we never walk straight up to the door. We come at it from the side, because we learned long ago that frequently the men within will be in such a mental state that he will shoot right through the door."

"Often when you get inside, the man will be sitting looking into space, with his chin in his hands. He won't even glance up. I have worked about in a hut for hours without its owner moving or speaking a word, and he hadn't seen a human being in months."

"All of a sudden he will jump up and start to talk. Words pour out of him in a flood. I have had a man hardly drawing a breath between talk like that all night without words. It is a natural reaction after his long isolation. Sometimes when the officer continues his trip the trapper will follow a long distance along the trail, so great is his urge for human companionship. That little visit generally puts the fur seeker on his feet again."

"Occasionally real madness overtakes a man and then there may be tragedy. I remember one case where a trapper shot his partner while the latter was asleep. Then he shot himself. We found the pair that way weeks later."

The Answer Is No

Lord Nuffield, the former Sir William Morris, manufacturer of popular low-price English automobiles, has offered Oxford University over \$6,000,000 to extend its work of medical research. Could the State, seizing fortunes of men like Lord Nuffield, make an expenditure as wise with the same amount of money?—Ottawa Journal.

Glycerine Shortage

Shortage of glycerine, due partly to increasing armament requirements throughout the world and partly to a decrease in production in the last year or so, is cutting down its use in automobile anti-freeze solutions, informed trade sources said.

It is thought that the secret of Stradivari's pre-eminence in violin manufacture lies in the varnish he used. Its formula never has been duplicated.

Russia plans to increase production of commercial vehicles by 130,000 units this year.

Russia has built 16 oil refineries this year with a yearly capacity of 3,220,000 tons of crude oil. 2176

Would Launch World Campaign

Marchioness Of Aberdeen Appeals To Women To Prevent War

On behalf of 40,000,000 women in 36 countries, Lady Marchioness of Aberdeen, now in her eightieth year, made a strong plea for peace at the opening at Dubrovnik, Yugoslavia, of the Congress of the International Council of Women.

Lady Aberdeen, who as wife of the late Marquess of Aberdeen, Governor-General of Canada, 1883-98, was a beloved Chateaufort of Rideau Hall, Ottawa, likened the council to a women's League of Nations, which, however, she declared, "would not evade its responsibilities."

"I ask all women to launch a world-wide campaign to save humanity from war. The menace comes from those nations which want to expand and which are seeking to destroy their brother nations."

Lady Aberdeen concluded with an appeal for the respect of personal liberty, "so essential to the well-being of mankind."

Strange Case Baffles Doctors

Man In Trance Ten Years Smokes And Plays Cards

Outrigger "dead to the world," the "Bip Van Winkle" of Springfield, Mass., sits in his favorite armchair and slowly puffs his pipe, apparently unaware that he has passed the tenth anniversary of his lapse into a coma that has baffled medical science.

Actually, H. William Lord is awake. But he responds to none but his wife, who has nursed him through a decade-long trance. As far as Lord himself is concerned, the past few years are mostly blank.

Lord, born in Canada 62 years ago, is emaciated, and his hair, once black, has silvered.

It was on Oct. 26, 1926, that Lord first lapsed into a trance. He slept for nearly four years. One morning in 1930 he awoke and glanced out a window. The sun was high.

"Say," he called to Mrs. Lord, "I've overslept. I'll be late to work."

For three months he remained awake. Then one afternoon Mrs. Lord found him asleep in a chair. This time he slept six years.

His only diversion is cards, which he plays with Mrs. Lord. Neither he nor his wife can read or write.

Editor For A Day

New Radio Head Published One Issue Of McGill College Paper

Editor for a day of the newspapers was found 26 years ago when the lot of Major W. E. Gladstone Murray. The newly-elected head of the Canadian Broadcasting Corporation, returning to McGill for the Graduates' Quintennial Reunion, was "in charge" of one edition of the McGill daily, Canada's oldest college paper.

Twenty-six years ago Major Murray, then a McGill undergraduate, founded and became first editor of the daily, and this issue was published entirely by McGill graduates. The leading editorial was from Major Murray's pen, and other material in the special issue was prepared by graduates formerly associated with the undergraduates' paper.

Chief Architect Superannuated

T. W. Fuller, chief architect of the public works department in the federal government, and an employee of the department for more than 40 years, has been superannuated. It was announced recently. His retirement dates from Nov. 3. It was also announced C. D. Sutherland has been appointed acting chief architect for the department.

Ban Use Of Rubber

Under Chancellor Hitler's four-year economic self-sufficiency plan, German children will be deprived of rubber balloons and the maidens of the third Reich will not be able to wear rubber garters. A decree of the Reich commissioner for rubber published bans the use of real rubber in a large number of articles.

Likes Life On Embankment

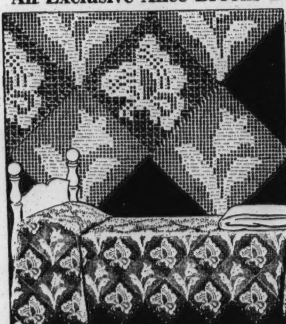

Man Who Inherited Fortune Does Not Care For Luxury

Sleeping out on the Thames Embankment every night is a man who could sign a cheque for the best part of £2,000. Huddled in an old overcoat, his nighty "bed" is either a paper-covered seat or the hard pavement. By day he tramps the streets and gardens, occasionally standing "treat" at a coffee stall to his less fortunate pals. Such is the life chosen by Edward Merrill, who inherited the fortune hoarded by his uncle, James Lister, an Edinburgh crossing-sweeper. Once a week Merrill "smarten's himself up," as he puts it, and pays a visit to his solicitors. There he "signs on the dotted line," and receives about £2—interest on his capital. Then, for a week, Merrill wanders again—the £2 he spends on his food and cigarettes. No one knows where he may be found in the day—but at night it is certain he will be on the Embankment again.

"I have had nearly 20 years of this life," he once said, "and no fortune would make me change—I love it." Merrill, in fact, just doesn't bother about money. For some time after it had been proved that he was entitled to the money he inherited, his solicitors searched for him in vain. Last July he was found in Kensington Gardens, hatless, hungry and penniless. He was taken to the solicitors, and it was only then he agreed to have the money invested and live on the interest.—Overseas Daily Mail.

It is believed that the coal supply of the world cannot last more than 500 years, if the average annual consumption of 1,500 million tons continues.

An Exclusive Alice Brooks Design

Household Arts by Alice Brooks

Handsome Squares Quickly Crocheted in String

PATTERN 5735

Here's liveness right at your finger-tips! A spread that's easy to crochet of string, and quite the most beautiful, ever! These decorative flat squares are done separately, the butterflies set off by a lacy K stitch, the flowers by plain flat mesh. Picture the beauty of refreshment cloths made from these, or a scarf or pillow. Smaller squares, that result from using finer cotton, make small but lovely gift articles. You can use the squares together or repeat just one design alone. In pattern 5735 you will find instructions and charts for making the squares shown; an illustration of them and of the stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

SUNDAY SCHOOL LESSON

THE HEROISM OF CHRISTIAN FAITH
Golden text: Greater love hath no man than this, that a man lay down his life for his friends. John 15:13.
Lesson: Acts 21:12-23, 30; Romans 9:1-5.
Devotional reading: II. Corinthians 4:7-15.

Explanations And Comments.
Paul's Reception at Jerusalem. Acts 21:17-26. Paul came to Jerusalem with a wonderful story of how the gospel message had been received among the Grecian Jews and Gentiles, and with abundant proof of their regard for the mother church in the money which they had contributed out of their deep poverty. The leaders of the Jerusalem church received Paul cordially, and after his recital they glorified God. Luke's account, however, makes no mention of their gratitude for the help of the Gentile churches. Apparently they passed at once to what was uppermost in their own minds.

"You see, brother Paul," the elders said, "what great numbers of Jews here have become followers of Thy Way, and they are all zealous for the scrupulous keeping of the law." To those Hebrew Christians Paul's great missionary success would be of little moment compared with the question whether Paul himself kept every jot and tittle of the law.

These new converts will hear of your coming, Paul, and will regard you with suspicion," continued the brethren, "for they have been told that you teach the Jews to forsake the laws of Moses and the customs of our fathers." Then they asked Paul to make a concession which, they thought, would win over his critics. Let him pay the charges for four men who had made a Nazirite vow and purify himself with them, that all might see that he observed the law. This proposal must have seemed to Paul, to paraphrase one of his own statements, only the becoming a Jew to the Jews that he might gain the Jews. The proposal involved no matter of principle, and he consented.

Mobbed in the Temple. Acts 21:27-30. The scheme of the elders did not turn out as expected, because Jews from Asia, Paul's old enemies, stirred up a riot. It was Pentecost, and Jews from over all the world were in Jerusalem. These men from Asia seized Paul and cried out: "Men of Israel, help! This is the man that teacheth all men everywhere against the people and the law, and this place."

Rescued by the Chief Captain, Acts 21:31-36. Up to the Tower of Antonia, came tidings to Claudius Lysias, chief captain of the band, that all Jerusalem was in confusion. With centurions and soldiers he ran down the stairs and by his timely intervention saved Paul's life, for he was being savagely beaten and would soon have been killed.

Bears Destroy Park Signs
One Theory Is That Oil In The Paint Attracts Them

Black bears in Great Smoky Mountains National Park, Washington, evidently are conservative in their tastes and resent any change from the old order.

This tendency has been manifested recently in their defacing and destruction of a number of the new wooden signs which have been posted along the trails for the convenience of hikers. The signs are of soft wood, lettered in green on a white background.

Bruin makes short work of them, expressing his displeasure by ripping off the boards and splintering them. Old, unpainted signs, with carved letters, are not molested. A theory is that the oil in the paint attracts them.

An Old Japanese Custom

Husbands Do Housework For One Day Every Year

Wives ruled homes in many parts of Japan for one day while their husbands did the housework.

The celebration is an annual ceremony during which Japanese men recognize formally the duties their wives must perform on all other days of the year.

At the town of Tamatsu, near Kobe, the entire populace gathered in the town hall, where husbands scrubbed floors, washed dishes and did the family wash. The wives enjoyed themselves eating and drinking.

Shot By Bandits

Mrs. L. M. Hockin, United Church of Canada missionary stationed at Kiating, 100 miles south of Chengtu, China, was shot in the left arm when bandits held up the motorbus in which she was travelling toward Chengtu. Mrs. Hockin's home is in Nova Scotia.

District Echoes

Miss Mary Murdoch was a Calgary visitor Monday.

Beit Mobbs, former resident, is again visiting in the district.

Miss Ella Turnbull, of the Calgary General Hospital Staff, was the guest of Mrs. S. Willis, on Saturday.

Miss Mildred Metheral, of Edmonton, visited her parents over the weekend.

Mrs. E. S. Halliday, of Calgary, visited with her daughter, Mrs. Amery, over the weekend.

Mr. and Mrs. G. Zang visited with the formers parents, last weekend.

Dr. and Mrs. McClelland, and Miss E. Seville, were Calgary visitors Saturday.

H. J. Klassen, of Didabury, was a weekend visitor at the Wall home.

H. A. Weir of Calgary, on his way to Camrose, stopped at the Chronicle Office to say Hello.

Howard Wright addressed the General Meeting of the United Grain Growers, last Wednesday, at Calgary.

Tom Chalmers is a patient in Calgary, having undergone an operation for appendicitis. Tom is doing as well as expected.

Mr. and Mrs. R. M. McCool, of Edmonton, were in town last weekend and visited with the former's mother, Mrs. McCool Sr.

Mr. and Mrs. T. Goldie and son Gavin, have taken up residence in town and will occupy the Stevens house, recently vacated by Mr. and Mrs. J. T. Davis.

Mr. D. Tweedle, of Milk River, visited in town over the holiday, leaving Thursday for the Teachers Convention, at Calgary.

Mrs. E. Longmire returned from Redcliff, Monday evening, where she had been called, owing to the serious illness of her mother.

The recent auction sale of R. M. McCool was poorly attended and prices were very low in most cases. Mr. Hendry called the sale, "Pinch-hitting for Mr. Larsen."

Mrs. E. K. Mitchell and son Robert, left for Kenowick Washington, Tuesday, to spend the winter. They will visit with Mrs. Mitchell's daughters.

A Lindgren was taken to Calgary last week, for attention. It may be possible that an operation will be necessary, and the sympathy of the district goes out to Mr. Lindgren at this time

Mr. D. B. Bills writing from California, says, "I am sure pleased the way the Presidential Election went, and am looking forward now to the new deal and higher standard of wages."

H. A. Bannister supplied the P.A. System for the concert at the East Carstairs Community Hall, last Friday night. Bert says, "The people there certainly make you feel at home."

Mr. R. Hendry, of Calgary, took auctioneer Larsen's place Saturday. Mr. Hendry and the Editor are old friends of many years standing, and had not seen one another for over eleven years. They had much to discuss about Vermilion days.

Mrs. H. Abra brought her young son home from Calgary, last Wednesday. Junior had been receiving attention at the Red Cross Junior Hospital, and the treatment administered, should prove successful. The many friends will be pleased to receive the above news.

Mrs. J. T. Davis, Mrs. J. P. Metheral, were Drumheller visitors last Wednesday. Mrs. Metheral visited her daughter, Miss Gladys Metheral, who is teaching at the Midland Vale school, while Mrs. Davis visited with her brother-in-law.

Activities of Societies Etc.

FLORAL U.F.W.A.

The usual monthly meeting of the Floral Local U.F.W.A. will be held November 18 (a week later than usual) at the home of Mrs. Orvil Bills.

Roll Call CURRENT EVENTS

WOMEN'S GUILD

Keep November 28th open and visit our Bazaar. Further particulars later.

SOCIAL CREDIT

The Crossfield Social Credit Group held its first social evening in the Masonic Hall, November 5.

In spite of the fact, the weather was extremely cold, a very enjoyable evening was spent.

Although the expected Orchestra did not arrive, music was in abundance. The programme, though shortened by the cold weather, was very much enjoyed. After the programme decks were cleared for action, and all those present proceeded to let their feet boil over to the strain of fiery music, supplied by the numerous Volunteer Orchestras which sprang up from all corners of the hall.

Toward the midnight hour, a supper waltz was called. As the waitresses were all in great demand during this dance, the short period between the supper waltz and serving of the scrumptious supper was taken up with community and solo singing.

The date of the next social evening will be announced later. Anyone with any worries, they would like to forget, should watch for the date and be on hand. We have the recipe for removing worries.

G. BUTLER,
President

BOARD OF TRADE

The usual monthly meeting of the Board will be held in the Oliver Cafe, Wednesday evening November 18, at 6:30 p.m. Special business is on the agenda and a full turn-out is expected. Let's have a list of those who will be there, as we have to guarantee the number to be served, and pay for any dinners not used. If you are interested in your community, you will be there, Wednesday, November 18. Rev. A. D. Currie will be the speaker for this occasion. Let's make it a real get-together meeting.

Members who read this notice pass it on.

DRAMATIC SOCIETY

Important business has come up that needs the attention of the Executive, and therefore a meeting of this Committee is called, for Monday evening, at 8:15 p.m. A full attendance of the Executive, is desired, and members should pass on this announcement, in case some of the members do not see it.

EAST COMMUNITY HALL

A Big Dance will be held, November 20, at the East Community Hall. Melody Boys in attendance.

Les Spivey has transferred his activities to Rosebud, as Manager of one of the stores there.

Mrs. J. A. Emery will give a paper on Music, at the Teachers Convention at Calgary.

The local school will be closed Thursday and Friday to permit the Teachers to attend the Convention at Calgary.

Mr. and Mrs. Claud Hoback have moved on to the Huser farms and will assume charge during Mrs. Mitchell's absence. It is expected that on Mrs. Mitchell's return, that Mr. and Mrs. Hoback will assist in the administration of the farm work.
